## Electrical Maintenance Programs That Help Maximize Facility Value

**Dynalectric Company (Florida) understands that you need your facility to run its best. That's why we offer some of the region's most comprehensive site-based maintenance services, performed by our team of highly trained, highly skilled electricians.**

### Value-Driven Preventive Solutions

We work closely with clients to develop preventive maintenance programs tailored to their unique facility needs and budget demands. Using leading-edge technology, our certified electricians can perform routine value-oriented maintenance, aiming to increase system efficiency, reduce operating costs, and minimize disruption to your operations. Combining electrical systems expertise and first-hand experience, our team can detect the source of a problem and correct it before it becomes a major cost burden.

### The Solution You Need—24/7/365

Whether for a maintenance contract or for work performed on a time and material basis, we can solve virtually any of your electrical maintenance needs. Our team is available 24/7/365, on a scheduled, emergency, or project basis.

Our staff is trained in a full spectrum of electrical disciplines, including repairs, motor controls, and basic circuit troubleshooting. They are also skilled in more specialized areas, such as high-voltage preventive maintenance and splicing.
